Specialist palliative care and chronic respiratory disease

Questionnaire for consultants in respiratory medicine

Dear Doctor,

This is a joint initiative between the National Council for Palliative Care (NCPC) and British Thoracic Society which is designed to complement other work done by the NCPC to better understand services for those with non-malignant disease. This questionnaire concerns services available for those with long term respiratory diseases and we would be most grateful if colleagues would spend a few moments completing this questionnaire if necessary in conjunction with their multi-disciplinary colleagues. **Only one consultant is being asked to complete this in each hospital and if it would be more appropriate for one of your colleagues to do so please do not hesitate forward it to him or her.**

The aim of the survey is to describe the current service provision of specialist palliative care for people with chronic respiratory disease (CRD) in England, Wales and Northern Ireland and to explore the interface between palliative care, respiratory and rehabilitation services in England, Wales and Northern Ireland.

Many thanks for your participation,

Lucy Sutton
National Policy Lead
The National Council for Palliative Care

Martyn R Partridge, MD FRCP
Professor of Respiratory Medicine
Imperial College London
